

Newhart Digital Orthodontic System™ /NDOS™

You've probably heard from friends or family that wearing braces is a long-term commitment, taking more than two years on average.

Not anymore.

With the *Newhart Digital Orthodontic System™* getting braces isn't what it used to be. You'll get outstanding results in less time with our innovative NDOSTM technology. Digital Analysis, 12 week appointment intervals, Time Release Arch wires™, and lighter forces result in minimal discomfort, quicker more accurate tooth movement, fewer appointments and shorter treatment times.

Precision Never Before Possible

The **Newhart Digital Orthodontic System™** provides state-of-the-art orthodontic treatment. We use advanced technologies and super accurate bracket placement techniques to greatly improve traditional treatment methods. NDOSTM technology provides maximum control of tooth movement, and this efficiency saves you time in treatment. Our Time Release Arch Wires™ deliver precise, constant, light forces to move teeth directly into target positions...we call it High Resolution-Low Force Orthodontics™.

- Spend less time in braces
- Need fewer office visits
- Experience reduced discomfort
- Receive high quality results
